

NPR-5305 *One-Step* KIT

This innovative, single package, 3-gallon kit makes epoxy protective lining an easy ONE-STEP mixing process. No more scales, pouring of sticky resins and messy cleanup! Both components are in a single container that allows you to simply place the mixing blade into the open pail and mix until a nice smooth color is evident. A few minutes mixing and you are done! Then rapidly remove all the epoxy by slinging it onto the surface to be lined. Once placed on the vertical or horizontal surface, the epoxy is smoothed and the rehabilitation is complete. The photo below demonstrates the simple tools necessary to mix and apply your new corrosion protection liner.

- *Environmentally Safe*
- *No measuring*
- *Easy to Use*
- *Reliable Performance*
- *Third-Party Tested*
- *Covers 32 Sq. Ft.
@ 125 Mils (1/8")*
- *Fills & Protects
Cracks, Joints
Exposed Aggregate
And Many Other
Surface Defects*
- *Bonds Like Crazy,
Stops Corrosion !!*
